Ayesha Khan

ayesha@example.com | +1 (555) 342-9182 | Senior Python & Backend Engineer

Professional Summary

Senior Software Engineer with 5+ years of hands-on experience designing scalable microservices in Python, Flask, and PostgreSQL. Proven track record deploying AI integrations, Docker containers, and optimizing REST APIs.

Technical Skills

Python, Flask, FastAPI, SQL, PostgreSQL, Docker, REST APIs, Git, Redis, Machine Learning, CI/CD

Work Experience

Senior Backend Developer - Apex Software Labs (2022 - Present)
Architected Flask and FastAPI microservices serving over 2M API queries monthly. Automated deployment pipelines with Docker and GitHub Actions, cutting deploy time by 40%.

Python Software Engineer - DataStream Solutions (2019 - 2022)
Engineered RESTful endpoints and optimized complex SQL queries in PostgreSQL, improving database throughput by 35%.

Education

B.S. in Computer Science - National University of Sciences & Technology (2019)

Key Projects

AI ATS Screening Platform: Built an intelligent document processing engine using Python, PyMuPDF, and vector matching algorithms.

Distributed Job Scheduler: Implemented asynchronous background job processing using Celery and Redis.
